Offshore Renewable Energy Wind Farm Accommodation

Modular Units

From our experience with Offshore Wind Farm projects we have learnt that this dynamic market sector faces many of the same environmental challenges that we have developed solutions for in the the Oil and Gas industry. Pre-commissioned Modular Units can provide a fast platform build to house emergency accommodation, generator housing, workshops and stores, etc.

Our high quality Calder Offshore Cabins™ are built to DNV 2.7-1 and EN 12079 standards and are fitted out to suit each customer's individual requirements. Standard cabin sizes from our own range are 10ft, 12ft, 15ft and 20ft lengths x 8ft wide.

Our split cabins can also provide a cost effective solution for housing more than one facility within a single unit, increasing flexibility and reducing footprint.

Certification	<ul style="list-style-type: none"> • DNV or Lloyds (as required)
Lifting Points	<ul style="list-style-type: none"> • Lifting pad eyes on top four corners. • ISO corner castings to bottom four corners. • Forklift pockets. • Optional certified lifting slings and shackles.
