

# Subsea Basket Hire

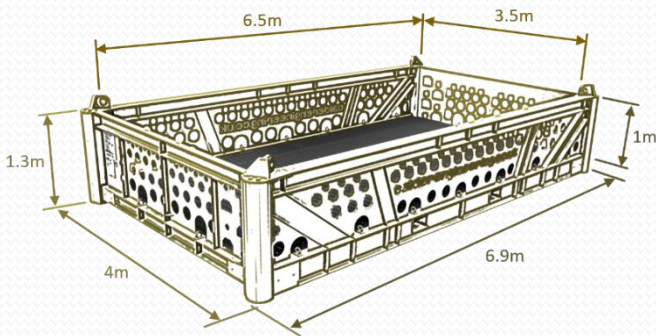

## Model XL/SUB01

### Extra Large Capacity Subsea Basket

Calder Engineering's large subsea basket has been designed with the challenges of subsea working and decommissioning in mind. Having a large payload of 15 tonnes, and internal size of 3500mm x 6500mm, it allows for ease of deployment and recovery of subsea equipment. This basket can easily accommodate a subsea concrete mattress with room to spare.

### Key Features

- ✓ Certified to DNV GL 2.7-3
- ✓ Operational class R45-S23
- ✓ 9.6t Admiralty deck eyes at 930 centres around internal perimeter
- ✓ Flowforge galvanised grated bottom to minimise the deployment and recovery loading
- ✓ Forklift pockets
- ✓ Underside of the basket is fitted with ISO corner castings for standard 20' x 8ft container footprint for unladen transportation
- ✓ Comes with a certified 4-point lifting set
- ✓ End panels have built in steps for access in and out of the basket

### Dimensions and Weights

Basket Type	Width (mm)		Length (mm)		Height (mm)		Pay Load (kg)	Tare (kg)
	External	Internal	External	Internal	External	Internal		
<b>XL/SUB01</b>	4000	3500	6900	6500	1300	1000	15,000	6,000
